VERA ISO 9001:2015

ALGERAC

SARL VERA CONFORMITE

Approved by the Ministry of Environment and Renewable Energies, we hold authorization for the transportation of special and hazardous waste and are ISO 9001 V 2015 certified for our quality management system.

Implementation Plan (ROAD MAP)

02.

Following the certification process, LE PAON ENVIRONNEMET drew up a waste management implementation plan

Recovery and treatment

Waste treatment, recovery (recycle and reuse) and final disposal.

Identification

Identification and classification of your waste in accordance with applicable regulations.

Traceability

Real-time access to documents related to the treatment of your waste: treatment reports, court bailiff reports, and recovery and destruction reports.

Reconditioning

Supply of IBCs, drums, buckets, and barrels that are compliant with dimensions and materials suitable for the storage and transport of hazardous substances

Support and Monitoring

Genuine expertise in handling and managing special and hazardous waste.

Logistics

Compliant and secure transportation, taking into account the specific requirements related to your activity

Our services

03.

Delegated Waste Management

"Le PAON Environnement" provides customized solutions directly at the customer's production site, including collection, sorting, removal, and disposal.

Sewer Cleaning, Sanitation & Confined Space Cleaning

Sludge and wastewater extraction from treatment plants and sewer pipe cleaning.

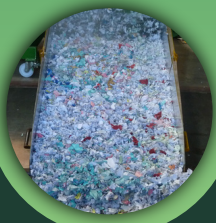

Disposal by incineration Special and Hazardous Waste

This service covers special and hazardous waste, including expired chemicals, healthcare risk waste (DASRI), and industrial sludge, with the option to attend the incineration process.

Secure destruction of archives & confidential documents

The destruction is ensured and carried out in compliance with legislation, guaranteeing the confidentiality of information.

Recycling and waste recovery

This service covers all types of recoverable waste, such as plastic, paper, glass, metal, etc., for transportation to a recovery center

Decontamination and remediation of industrial sites.

Site analysis, identification of pollutants, risk assessment, soil decontamination, and transportation to treatment facilities.

Our services

Roll-Off Container Rental Service

The roll-off container rental service offers a flexible waste management solution for all types of businesses, providing robust and modular containers suited to various types of waste, including:

01. Household and similar waste
02. Glass waste
03. Plastic waste
04. Paper and cardboard waste
05. Ferrous waste

This solution aims to minimize air pollution by reducing the number of transport rotations and optimizing waste storage space by offering containers of various sizes and capacities based on demand and waste generation rates.

Types of waste handled

05.

- Solid waste containing hazardous substances
- Sludge from on-site wastewater treatment containing hazardous substances
- Waste from the manufacturing, formulation, distribution, and use (FFDU) of fine chemistry products and other unspecified chemical products
- Waste from the manufacturing, formulation, distribution, and use of pharmaceutical products in on-site wastewater treatment

- Detergents containing hazardous substances
- Solvents, acids, and waste containing hydrocarbons
- Paints, inks, adhesives, and resins containing hazardous substances

- Agrochemical waste containing hazardous substances
- Sludge from on-site wastewater treatment containing hazardous substances
- Packaging containing hazardous substance residues or contaminated by such residues

- Desalination sludge
- Basic waste
- Used oils

- Plastic waste
- Cardboard and paper waste
- Glass waste
- Wood waste

Why Choose Us?

Environmental protection

Waste management while protecting the environment and public health.

Proposal of technical solutions for waste management in compliance with regulations.

Technicité

Reliability

Waste disposal and recovery while ensuring full traceability.

Our Values and commitment

01. Environmental Sustainability

We are committed to minimizing all types of negative environmental impact.

02. Customer Satisfaction

Approved by the Ministry of Environment and ISO 9001:2015 certified, LE PAON guarantees high-quality services delivered by an experienced team, in full compliance with environmental standards and regulations.

03. Social Responsibility

We are committed to protecting public health from any negative impact of waste and contributing positively to community well-being.

04. Circular Economy

We are committed to promoting waste reuse, recycling, and recovery, prioritizing these solutions over simple disposal. By adopting this approach, we actively contribute to economic growth while primarily preserving natural resources by encouraging sustainable practices that support the health of our planet for future generations.

05. Integrity and Transparency

We ensure that every operation is carried out with complete transparency and in full regulatory compliance with applicable laws, guaranteeing the integrity and legality of each waste management process.

06. Health and Safety

The safety of employees and stakeholders is our top priority. LE PAON Environnement provides high-quality training for its employees on protective measures and the safe handling of hazardous materials.

Our Team

QHSE TEAM

QHSE and Environmental Compliance Managers ensure the safe execution of treatment operations while ensuring compliance with applicable regulations.

CHEMISTRY & ENVIRONMENT TEAM

Environmental engineers implement technical solutions for ecology, while chemical engineers identify waste types and determine the appropriate treatment process.

OPERATIONS & LOGISTICS TEAM

Managers, collection drivers, and operations specialists ensure compliance with rotation schedules to transport waste from the collection point to its final destination.

CUSTOMER RELATIONS TEAM

A qualified sales team dedicated to efficiently managing the needs of our clients and partners.
